

UNIT NUMBER	TREES	RECOMMENDED SERVICE	REASON FOR RECOMMENDATION
	2	1 Prune	Remove unhealthy branches, uplift for truck, reduce branches growing towards units
	52	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	4	2 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	53	1 Removal	Noticable damage from previous prune that has allowed rot to form from incorrect cutting technique, the rot will continue throughout the tree
	54	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	55	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	6	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	56	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	7	1 Removal	Due to previous lopping, tree has producted unnatual epicormic growth
	8	1 Removal, hedging	Removal of tree will allow adequate sunlight for healthy growth of hedge. Hedge will be reshaped to encourage fresh growth
	16	2 Prune	Weight reduction of larger limbs to minimise risk. Uplift for pedestrians and bin truck, reduction of branches growing towards units
	17	2 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	19	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	18	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	57	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	21	1 Removal	Tree is weighted towards the house with an unhealthy union at the fork.
		1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	60	1 Removal	Poor spacing for tree to thrive due to shared garden space with another tree.
		1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	24	2 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	25	1 Removal	Has included bark, crossed over branches which is causing rubbing that can result in damage or rot to the limbs that can continue throughout the tree
		1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	28	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	29	1 Prune	Heavy reduction of limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
OPPOSITE	31	1 Removal	Removal to open space for a potential garden bed or hedge.
	30	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	32	1 Removal	Tree is too large for space, growing too close to units, roots are lifting above ground which may damage the driveway in future
FENCE AT END OF	34	11 Lopping	Lop 11x trees located along fence line back to fence height
		2 Prune	Prune limbs/branches overhanging fence into neighbouring properties.
	35	1 Prune	General prune, canopy reduction, removal of epicormic growth
	36	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	62	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	38	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	63	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	64	2 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	68	1 Garden clear	Trees and plants growing inside hedge. Recommended to remove all trees and plants in garden to allow planting of maintainable species
	40	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	66	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	41	1 Prune	Height reduction of tree to allow growth at a reasonable height
	68	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	42	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	43	1 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
OPPOSITE	43	1 Removal	Tree is too large for space, growing too close to units, roots are lifting above ground which may damage the driveway in future
	44	2 Prune	Removal of unhealthy limbs/branches, uplift for pedestrians and bin truck, reduction of branches growing towards units
	45	2 Prune	Removal of limbs growing towards and hanging over fence line. Cut vine growing in tree back to ground level.
OPPOSITE	46	1 Removal	Removal of Chinese Elm sapling growing in hedge
	49	1 Removal	Too large for space and too close to units, roots lifting above ground. Many birds in tree leaving droppings on driveway and vehicle
